SUMMARY

With a mathematical background and experience in data analytics have developed a strong interest in using quantitative methods to solve complex business and financial problems. My experience working with large datasets, market analysis, and trend analysis has strengthened my interest in statistical modeling, financial analytics, and data-driven decision-making. Currently pursuing a Master's degree in International Business, developing a complementary understanding of markets, business strategy, and economic decision-making. Aspire to combine quantitative analysis with business and financial insights to support rigorous, data-driven decisions.

EXPERIENCE

Digital & Data Analyst

August - December 2024

PT Ivonesia Solusi Data (Ivosights)

- Managed 15+ daily, weekly, bi-weekly and monthly statistical reports using Ripple10, including data sentiment validation and presentation in the form of charts, tables, and graphs.
- Presented comprehensive social media analytics and actionable insights to clients through detailed executive summaries and interactive dashboard visualizations.
- Completed capstone project analyzing beverage industry trends using Python, applying statistical methods to identify consumer preferences, market patterns, and growth opportunities in the contemporary beverage sector.

Virtual Data Manager

May - August 2024

PT Talenta Sinergi Group (Eduwork)

- Managed and validated data for 3,000+ job-related tasks, ensuring data accuracy, consistency, and completeness across job portal listings.
- Organized and maintained large datasets to support efficient job-matching and placement processes for students.
- Conducted Focus Group Discussions (FGDs) and simulated interviews with 3+ students, collecting and synthesizing feedback to identify patterns in students' job-search needs.

Data Management

February - May 2024

Malang City Department of Cooperatives, Industry, and Trade

- Improved data quality and reliability for market analysis by cleaning, standardizing, and validating 10K+ datasets from 26 traditional markets in Malang.
- Generated actionable market insights through data mapping and visualization in Tableau, supporting analysis of street-vendor and market-trader activity.
- Maintained and validated structured records across 26 traditional markets, ensuring data integrity, consistency, and compliance for downstream analysis.

Data Analytics Junior Research

May - July 2023

PT Viktori Aksara Teknologi Indonesia (V-TEKI)

- Improved data quality and reliability for market analysis by cleaning, standardizing, and validating 10K+ datasets from 26 traditional markets in Malang.
- Generated actionable market insights through data mapping and visualization in Tableau, supporting analysis of street-vendor and market-trader activity.
- Maintained and validated structured records across 26 traditional markets, ensuring data integrity, consistency, and compliance for downstream analysis.
